MOHAIMINUL ISLAM
Web Developer

PROFESSIONAL SUMMARY

I'm a front-end web developer with strong experience in building modern, responsive web applications. I specialize in **Next.js** and **React**, creating clean, efficient UIs with **SCSS** for custom styling. I also have a solid understanding of backend technologies like **PHP**, **MySQL**, and **SQL**, which helps me build full-featured, dynamic websites.

I'm comfortable working with **AJAX** and **REST APIs**, allowing me to integrate data seamlessly into applications. On top of that, I have a background in **cybersecurity**, so I always develop with performance and security best practices in mind.

WORK HISTORY

Full Stack Web Developer, 01/2018 to Current
Freelance - Remote
• Developed and maintained custom websites and web applications for a diverse range of clients.
• Specialized in both front-end and back-end development using technologies such as Next.js, React, JavaScript, and TypeScript.
• Collaborated with clients to gather requirements, design user interfaces, and implement responsive, SEO-friendly websites.
• Provided ongoing support and enhancements to ensure optimal performance and user experience.
• Managed multiple projects simultaneously, delivering high-quality work within tight deadlines.

Front End Web Developer, 11/2023 to 10/2024
Wolast Technologies - Dhaka (Remote)
• **Built Responsive Web Interfaces**: Developed and maintained user-facing features using **HTML, SCSS, JavaScript, React, and Next.js**, ensuring fast performance and clean, modern design across devices.
• **Focused on UI/UX and Accessibility**: Designed intuitive, accessible interfaces tailored to user needs, with an emphasis on **responsive layouts**, **SEO optimization**, and consistent design systems.
• **Collaborated with Clients and Teams**: Worked closely with clients and stakeholders to gather feedback, translate business goals into user-friendly designs, and iterate quickly based on user input.
• **Maintained and Improved Front-End Code**: Provided ongoing updates, performance tuning, and front-end refactoring to ensure a scalable, maintainable codebase aligned with modern web standards.
